John Jay Qualifier

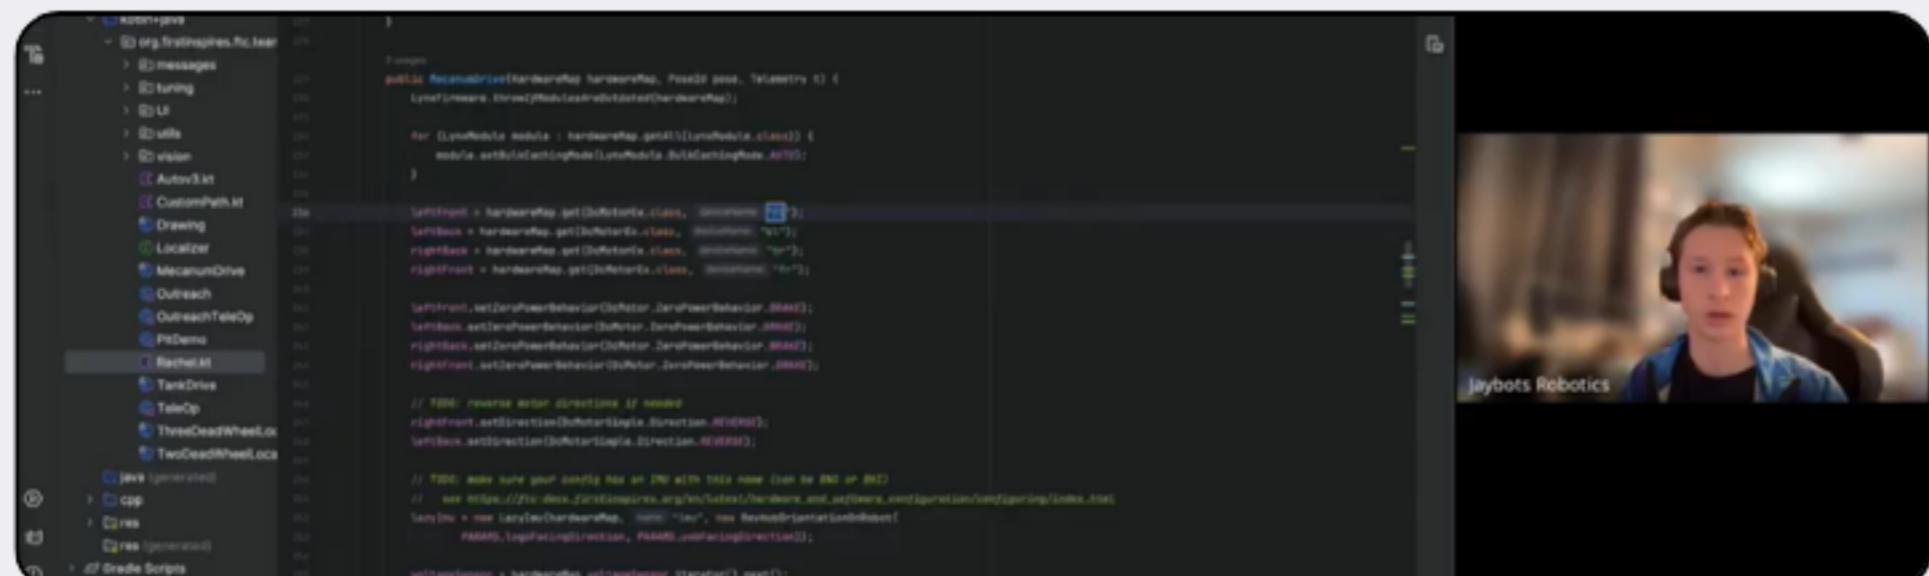

We hope everyone had a restful holiday and a wonderful start to the new year! On 12/6, Our team hosted the John Jay Qualifier where 27 teams joined us at John Jay Senior High School to compete. We offered 3D printing services to teams who needed to print emergency parts or make quick repairs with our 3D printing pens. Overall, it was a great competition, and we'd like to thank all of the volunteers who made this event possible, and all of the teams that attended! Congratulation to the teams who qualified!

Watch us compete live on January 11, 18, & 25: **JAYBOTS.ORG/LIVE**

Coding Workshop

We invited FTC Teams to join us for our Virtual Coding Workshop on 12/14. Thank you to all of the teams who attended!

Inventory

We've created a fully featured inventory management system including user management, an admin panel, and the ability to track the usage of thousands of parts from several suppliers across multiple projects. The website looks great on all displays from phones to ultrawide monitors.

Let us know if you are interested in using it and we can set you up with it

Tech Merit Badge Day

Our Code Leader, Anthony, working with a scout.

Our President, Matthew, doing a presentation on programming.

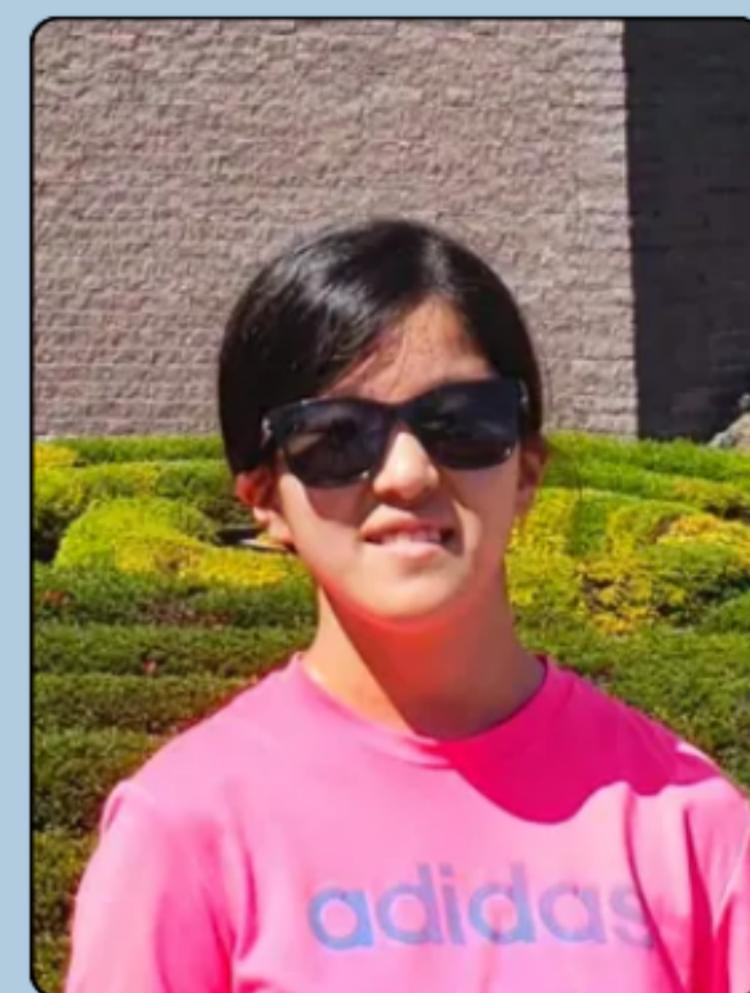

Our Coach, Mr. Amodio, presenting to scouts.

Our Code leader working with a scout on a robotics related activity.

Message from our Vice President

“ December has been really busy, but it's exciting to watch our robot get built and our team grow closer over the last few weeks. I'm looking forward to the qualifiers in January and demonstrating how much we've accomplished. ”
