

# JAYBOTS JOURNAL

visit our website at: [JAYBOTS.ORG](https://www.jaybots.org)

Email us at: [hello@jaybots.org](mailto:hello@jaybots.org)

It has been an eventful month! In the past few weeks we have held **workshops** and attended **community events**. You can learn more about these below. We also attended the last qualifier of the season, **Broadalbin-Perth!** You can find information about our **upcoming events** below.

## Upcoming

### Excelsior Regional Championship

We qualified for the Regional Competition at the Utica Qualifier at the beginning of the season. We look forward to competing at the **Excelsior Regional Championship this weekend!**

### CAD Workshop

Come join us for our Virtual CAD workshop! It is open to all FTC teams. You will learn how to CAD a full FTC robot using OnShape. Scan the **QR code on the flyer on the next page** to register your team. We look forward to seeing you there!

## Past Month

### 2/6 Van Wyck International Night

We attended and demonstrated our robot to people who stopped by our table. We also handed out wristbands and pins.

### 2/21 - Cub Scout STEM Workshop

We hosted a STEM workshop for any Cub Scouts interested in 3D printing and CAD. They learned how to use TinkerCAD, how to use a 3D printer, how a 3D printer works, experimented with our 3D printing pens, and saw a demonstration of our robot.

### 2/28 Winter Carnival

People drove our outreach robot to try and score the most points, and we also hosted a planetarium show every 10 minutes. It was a lot of fun!

### 2/8 - Chocolate 3D Printing Workshop

We hosted a Chocolate 3D printing workshop where participants learned how to use TinkerCAD, and saw a demonstration of our robot.

See where we will be competing next at:

# Broadalbin-Perth Qualifier

Broadalbin-Perth was the last, but definitely not the least fun, qualifier of the season. It was a great competition! Thank you to RoBovines for hosting! We competed well, and ranked 2nd place after qualifying matches. We advanced to the playoff matches where we formed an amazing alliance with MechAgoge, and earned second place alliance captains! We also won the First Place Innovate Award! We cant wait to see these teams at Regionals!

## Upcoming CAD Workshop

### JAYBOTS CAD WORKSHOP

FTC Online CAD Workshop!

**4TH** 4PM-6PM  
**MARCH**

<https://jaybots.org/cadworkshop>

Sign up using the form and we will send you the meeting link!

### Message from our Outreach Coordinator

“ We have had an incredible season: building, refining, and sharing our passion for robotics with our community. All that effort has brought us to this moment, so let’s carry everything we’ve learned into next week! **Go Jaybots!** Best of luck to everyone! ”
