Canada Cup Updates

Earlier this month, we traveled to Ontario, Canada, to compete at the **Canada Cup Premier Event** alongside 96 of the world's top FTC teams. After months of hard work, it was exciting to represent our community on an international stage and compete against some of the best teams in FIRST.

Throughout the event, Rio achieved an **event-high score of 308** points and was honored with the **2nd-Place Design Award**, recognizing our team's engineering process and robot design. Beyond the competition, our members had the opportunity to meet teams from around the world, share ideas, and create lasting memories.

We are incredibly proud of everything our team accomplished this season and grateful to our mentors, sponsors, and supporters who made this experience possible.

Match Results		Qualification 53 of 78	
★ Event High Score ★		Red	Blue
🏆 WINNER		308	198
6	LEAVE	6	
241	ARTIFACT	151	
26	PATTERN	26	
30	BASE	15	
5	FOUL	0	
16700	4 -		23208 12 -
51	2 ↑		12736 7 ↓

Message from our Creative Director

“

This year we had a smaller team, and it came with its challenges. But honestly, growth ended up being the thing that defined us. We pushed through, strengthened our portfolio and banners, and turned a lot of tough moments into real momentum. Now we're heading into the new year with a stronger foundation, and I'm genuinely excited for what's ahead.

”

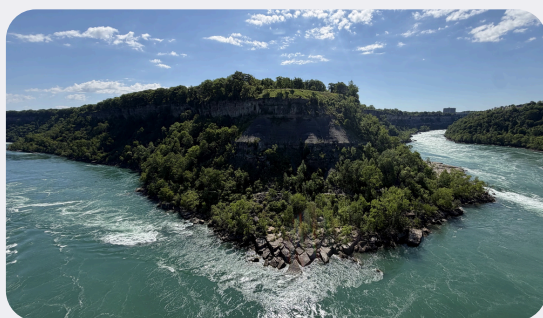

Exploring Canada

In addition to competing, our team took time to explore some of Canada's most iconic attractions. We visited the breathtaking **Niagara Falls**, where we enjoyed incredible views of one of the world's most famous natural wonders. Our

team also toured the **Niagara Parks Power Station**, learning about the history hydroelectric power and how the station helped shape the region's development.

One of the highlights of the visit was walking through the **2,200-foot**

underground tunnel, which leads to a unique observation deck at the edge of the Niagara River. The tunnel gave us a fascinating look at the station's engineering before opening up to a spectacular view of the falls. Exploring these landmarks gave our team the opportunity to learn, bond, and create unforgettable memories beyond the competition.

Upcoming Season Officers

President: Anika Anne
Vice President: Ava Davis
Code Leader: Anthony Chen
Build Leader: Nate Marra
CAD Leader: Gianni Giuliano
Manufacturer: Collin Price

Webmaster: Raghav Mathur
Gamemaster: George Eichenhofer
Creative Director: Kevin Sanchez
Outreach Leader: Nicole Lillo
SITCOM: Erika Lillo
Librarian: Johnny Price
