

JAYBOTS JOURNAL

Jaybots Advance to Premier Event!

At the NY Excelsior Regional Championship in Utica last weekend, we placed 5th out of 32 teams from across NY, advancing us to a Premier Event. Premier Events are high-level, international, invite-only events for top FTC teams based on their performance at their Regional Championship. There are events across the world, including Canada, California, and even in the Netherlands! We'll know which event we've been selected for soon. We also won 2nd Place Inspire, the highest award an FTC team can earn, and partnered with team #11205, Edgemont Robotics, in the playoffs.

At Regionals

On the first day, we completed judging where we talked about the outreach we have done so far this year, how we built our robot, and outlined our plans for the future. We also won our first qualifying match! On the second day of the competition, we competed well and invited teams to join us at our pit, which had many games, making the competition a blast! We cheered on our drive team throughout the day, and competed in the Playoffs with Edgemont Robotics! We had a great alliance, and hope to have the opportunity to work with this team again in the future!

We are excited to find out where we'll be competing next! Stay tuned for our next newsletter later this month, which will have more information about our advancement!
